ABOUT ME

Data science professional with expertise in artificial intelligence and quantum computing. Experienced in extracting insights from complex datasets, building predictive models using classical machine learning, and designing quantum circuits for data-intensive problems. Passionate about applying quantum algorithms to accelerate data processing and solve optimization challenges.

EXPERIENCE

Pktron, Canada, 2026

Ambassador

As a Quantum Computing Ambassador at PKTRON Pakistan, I represented the organization in promoting quantum computing education and innovation.

Leading UPVC, Qatar, 2025

IT consultant

Advises organizations on how to use technology to improve business performance, and support digital transformation. They analyze business needs, recommend technology solutions, and often assist with implementation and project management.

Biotechnology research center, Algeria, 2024- 2025

Research assistant intern

Applied KAN for interpretable modeling of complex biological data, alongside YOLO real-time object detection models for efficient image analysis tasks such as cell detection and microscopy-based classification.

EDUCATION

2023 bachelor's degree in computer science

University of constantine 2

VOLUNTEERING

2026 Egypt quantum computing

2025 Azure Qatar community

2022 Google developer group Constantine
